

## CalmAcid Reflusso

&NBSP;EUR

### 21 SINGLE-DOSE PACKETS

CalmAcid<sup>®</sup> Reflusso is specially formulated to counteract reflux, protect the gastro-oesophageal mucous membranes and curb stomach hyperacidity, thus reducing the relative symptoms, such as regurgitation, oesophagitis, heartburn, cough, nasopharyngeal inflammation and disorders due to gastro-oesophageal reflux.

CalmAcid<sup>®</sup> Reflusso contains Sodium Alginate, White Clay, Fenulife<sup>®</sup> (a Greek Hay extract rich in galactomannans) and Mallow mucilage. These components form a mechanically adhesive barrier in the upper part of the stomach that prevents the gastric reflux from reaching the oesophagus, thus protecting the mucous membranes against the irritation caused by the gastric juices. Furthermore, the Coral calcium carbonate and Potassium bicarbonate help to curb hyperacidity and reduce heartburn.

CalmAcid<sup>®</sup> Reflusso can even be used in combination with various drug therapies for gastro-oesophageal reflux, with your Physician's approval.

### WHEN TO USE IT

To counteract gastro-oesophageal reflux and reduce the relative symptoms (regurgitation, oesophagitis, heartburn, cough, nasopharyngeal inflammation and disorders due to gastro-oesophageal reflux).

### HOW TO USE IT

Dissolve the contents of the packet in half a glass of cold water, stir and drink immediately.

Adults: 1 packet after meals or just before bedtime, or as otherwise indicated by your Physician.  
During Pregnancy and Breast-feeding: do not exceed the maximum dose of 6 sachets per day.  
Children (3-12 years old): only administer under the advice of a Physician.  
Children (under 3 years old): do not administer to children under 3 years of age.
