

[:it] Arnica Pomata Eudermica Bio [:en] Arnica Pomata Eudermica Bio [:]

11.50 EUR

50 ML

Arnica Pomata Eudermica Bio is a cream with a high soothing power based on organic Arnica Montana mother tincture (20%), organic Horse Chestnut and organic Centella asiatica hydro-glyceric extracts, organic Sunflower oil and a special organic sweet Almond oil titrated with β -sitosterol. Arnica Pomata Eudermica Bio is a solution recommended for massage in cases of localized discomfort.

The Almonds used in Organic Eudermic Creams come from the organic farm in Parco dell'Alta Murgia in Apulia and are collected manually. To obtain the oil, an ecological extraction method is used, called "CO2 SUPERCRITICA" that uses no solvents or high temperatures, obtaining a highly pure sweet Almond Oil, an unchanged biological activity and a high percentage of phytosterols, β -sitosterol above all.

WHEN TO USE IT

For soothing and relaxing massage.

HOW TO USE IT

Spread and massage lightly on the interested areas. The application can be repeated multiple times during the day, as required.

WHAT IT CONTAINS

Organic sweet Almond oil, Arnica Montana mother tincture 20%, Horse Chestnut and Centella Asiatica organic hydro-glyceric extracts.
