

Larimucil Tosse Adulti

&NBSP;EUR

16 SINGLE-DOSE SACHETS, 175 ML

Larimucil® Tosse contains Larch Arabinogalactans, Plantain, Marshmallow and Iceland Lichen. These natural components form a protective film on the mucosa of the first airways that, opposing the contact with irritating external agents, soothes coughs. Its carefully selected components promote mucosa hydration, promoting the removal of excess mucus. Larch Arabinogalactans, Iceland Lichen, Marshmallow and Plantain polysaccharides have mucoadhesive and protective properties that, coupled with the soothing properties of Honey, protect the mucosae of the first airways.

Larimucil® Tosse syrup has a pleasant taste thanks to the presence of concentrated apple juice. Available in bottle or practical pocket-sized single-dose sachets.

WHEN TO USE IT

To protect the mucosa, soothe dry and wet coughs and facilitate mucus removal.

HOW TO USE IT

We recommend using a spoon or a syrup sachet from 2 to 4 times a day.

WHAT IT CONTAINS

Fructose syrup, Honey, concentrated apple juice, Larch Arabinogalactans, Plantain grass with flower extract, Iceland Lichen thallus extract, Marshmallow root extract, natural Lemon flavouring, Karaya Gum, Thyme essential oil.
