

## Prostel

24.00 EUR

30 CAPSULE

Prostel<sup>®</sup> is a dietary supplement from Bios Line's research, with Serenoa, Rosemary, Zinc, Selenium and Lycopene extracts. Serenoa, a dwarf palm that produces a dark red fruit, and Tomato extract titrated with Lycopene can be useful for prostate functionality. Zinc helps protect the cells from oxidative stress and maintain the normal testosterone levels while Selenium promotes spermatogenesis. With its antioxidant activity, Rosemary extract completes the formulation.

### WHEN TO USE IT

To restore your wellbeing combating disorders of the urinary tract.

### HOW TO USE IT

1 capsule per day with a little water during meals.

### WHAT IT CONTAINS

Serenoa fruit, Rosemary leaves, Tomato Lycopene, Zinc and Selenium.

### NOTES

The swelling of the prostate affects a very high number of men from the age of 40 and manifests itself with various symptoms among which the continuous need to urinate and, at the same time, difficulty to start urinating, weak and intermittent flow, a burning feeling while urinating and the increase in urinating frequency both during the day and at night (nicturia).

These problems have a series of negative consequences going from the deterioration of the sleep quality to the embarrassment in social and work situations and to the negative repercussions on sexual activity. However, even if a lot of men consider them an inevitable consequence of ageing, there are natural products that can positively influence prostate function. Read the instructions on the package.
