28.50 EUR

1000 ML

Aloe vera, a succulent plant with succulent leaves, cultivated for centuries in South America, has always been known for its many properties and its beneficial effects on the body. Thanks to the mucilages it is rich in, the pulp has an emollient and soothing action on the mucosa of the digestive system and supports the digestive function. Furthermore, it is useful for the liver function by contributing to the body purifying functions.

Bios Line Aloe Vera Pura is a pure product, it contains not rehydrated and undiluted Aloe fillet juice and pulp.

For the production of Aloe Vera Pura, plants cultivated for 4-5 years are used, harvested at the time of the maximum concentration of plant active ingredients. The cold working of the leaves, within a few hours of harvesting, and the absence of high temperature processes guarantee a high quality product with a high concentration of plant ingredients. In addition, aloe manual processing allows eliminating the external tip and cuticle, rich in aloin and irritant anthraquinone derivatives.

Garanzia International Aloe Science Council

Certified by the International Aloe Science Council.

WHEN TO USE IT
